5. (amended) An explosion-proof hot water heater as claimed in claim ~~4~~ 1 wherein said support base is provided with venting apertures thereabout to cool said sealed bottom wall.
6. (amended) An explosion-proof hot water heater as claimed in claim ~~4~~ 1 wherein the distance between said gas sensing element and said air intake openings provides an approximate time delay of two minutes for said explosive vapour to rise to said intake openings.
7. (original) An explosion-proof hot water heater as claimed in claim 2 wherein said air passage means comprises a circumferential air deflecting wall spaced inwardly of said outer skin casing adjacent said air intake openings for directing air aspired by said burner downwardly towards said sealed bottom wall and then through passage means disposed spaced adjacent said combustion air intake ports.
8. (original) An explosion-proof hot water heater as claimed in claim 7 wherein said air deflecting wall has a curved top portion defining an outer circumferential outer edge dimensioned to abut against an inner surface of a bottom portion of said outer skin casing.
9. (original) An explosion-proof hot water heater as claimed in claim 8 wherein said air deflecting wall has a straight bottom portion defining a lower circumferential edge adapted to rest on said sealed bottom wall, and openings disposed about said straight bottom portion adjacent said lower circumferential edge and consisting said passage means.
10. (original) An explosion-proof hot water heater as claimed in claim 9 wherein a circumferential spacing means is secured to said straight bottom portion and disposed above said openings and extends between said straight bottom portion and said circumferential side wall of said combustion chamber, and a fireproof thermal insulation jacket, said air deflecting wall and said side wall of said combustion chamber, said insulation jacket having air passages aligned with said openings of said straight bottom portion of said air deflecting wall.
11. (original) An explosion-proof hot water heater as claimed in claim 1 wherein said circumferential side wall of said combustion chamber is constituted by a steel cylinder
